

# TRANS VOICES

A VISUAL  
VOICES EXHIBIT

Visual Voices is a participatory, qualitative research method which combines painting, drawing, writing, and discussion to amplify community voice.

This is an exhibit of art by seven transgender and nonbinary survivors of intimate partner violence created as part of a Visual Voices research study. To learn more about the research study, you can reach out to Kayla Ortiz (she/her) at [kho4@pitt.edu](mailto:kho4@pitt.edu).

View the gallery of art by scanning this QR code with the camera app on your phone.
